

Magento Automatic PIM

The Magento® Automatic PIMCore® Integrator Developed by CSS Commerce

CSS Commerce developed the Magento Automatic PIMCore Integrator® to simplify and accelerate integration between Magento and PIMCore. The Integrator will automatically discover categories, attributes and classes in Magento to create a folder structure in PIMCore to model the data already existing in your Magento websites by taking advantage of the Master Data Management (MDM) capabilities inherent in PIMCore and using the standard Magento application program interface (API).

This Integrator enables PIMCore in Magento and in few moments and synchronizes in Magento data. Thus, we offer a more straightforward and efficient process.

Key Features of Magento-PIMCore Integrator:

- ❖ Manage and update Magento product information in PIMCore admin panel
- ❖ Enrich product information by creating new attributes to suit your needs or by using existing ones
- ❖ Publish product information in PIMCore and export it to Magento with single click
- ❖ Create categories, build tree data structure and export them easily to Magento
- ❖ Build up your media gallery, assigning assets and publishing it

Magento Automatic PIM

The Magento® Automatic PIMCore® Integrator
